[Trilogy Announces Q3 '03 Financial Results](#)

November 28, 2003. Trilogy Leasing, a diversified lessor specializing in technology, telecommunications, warehouse, and medical equipment is pleased to announce its results for the nine months ended September 30, 2003.

Through September 30th, revenues were \$17.5 million, a 10% increase over the same period in the prior year. Earnings for the nine months were nearly \$1.6 million, up 30% over the same period in 2002. Both revenue and earnings amounts represent record levels for Trilogy, now beginning its fifth year of operations.

Commenting on the results, Jeff Liebenthal, President and CEO of Trilogy stated, "Trilogy continues to perform well through the weak economy that the U.S. has been experiencing. We continue to sign new Master Lease Agreements and our portfolio continues to perform very well. Our cash position continues to grow and although we have had solid performance from our inception we are on the most stable ground in our history. Trilogy has expanded geographically during 2003 and we have further diversified our portfolio in terms of equipment content. We continue to develop complementary services which will enable us to be a one stop shop for the financing, supply, and implementation of technology solutions."

Although a private enterprise, Trilogy will continue to provide regular updates on its financial performance.
