Trilogy Leasing Announces 2008 Operating Results

CRANBURY, NJ, June 16, 2009 -- Trilogy Leasing, an independent leasing company specializing in Technology Equipment Leases, is pleased to report earnings of \$2.2 million for calendar year 2008. This was Trilogy's ninth consecutive year of substantial profitability while at the same time growing the lease portfolio each year. Revenues rose to a record \$27.2 million, a 6% increase over 2007.

"Although the global economy took a major turn for the worse during 2008, Trilogy continued on its path of profitable growth. At year-end, we were at record levels in terms of size of our portfolio, cash on hand and sales personnel in the field," states Jeffrey Liebenthal, President and Chief Executive Officer of Trilogy Leasing. "These are the three metrics that are meaningful to our team and they have continued to grow. We have actually taken advantage of the economic malaise. While many of our competitors, both large and small, have exited or backed off from the market sectors within which we operate, we have been taking market share as well as hiring seasoned individuals who have become available due to indiscriminate downsizings in the marketplace."

Trilogy Leasing is a private company but will continue to provide updates on its performance on a regular basis.
